Personal statement

4+ Years of experience as a Senior Product Support Engineer at Universal Softech Hub Pvt Ltd. I excel in advanced troubleshooting and fostering client interactions. With a proven track record of enhancing SQL query performance by 30% and reducing manual intervention by 40% my expertise in Python and Unix alongside exceptional time management skills significantly boosts operational efficiency and client satisfaction.

Senior Product Support Engineer

February 2021 to current

Universal Softech Hub Pvt Ltd - Bengaluru

WORK EXPERIENCE

Key Responsibilities & Achievements:

- **Technical Support & Troubleshooting:** Provided **end to end product support** resolving **10-12 complex technical issues daily** related to **SQL Unix and**
- **Python based applications** across multiple systems and time zones.
- **Incident & Problem Management:** Followed **ITIL best practices** for **incident resolution root cause analysis (RCA) and change management** ensuring minimal service disruption and **meeting SLAs**.
- **Database Management & Optimization:** Improved **SQL query performance** by utilizing **Joins (INNER, LEFT, RIGHT, FULL) indexing and stored procedures** reducing **query execution time by 30%**.
- **Documentation:** Developed **documentation for troubleshooting and knowledge sharing** reducing **manual intervention by 40%**.
- **Collaboration & Stakeholder Communication:** Acted as a **liaison between technical teams and clients** simplifying complex technical concepts for **non technical stakeholders** improving **customer satisfaction scores**.
- **Networking & Infrastructure Monitoring:** Diagnosed and resolved **network related issues** such as **slow speeds outages and connectivity problems** ensuring seamless operations.
- **Security Compliance:** Monitored server performance proactively **identifying and resolving potential bottlenecks** to **improve uptime and system reliability**.

Senior Product Support Engineer

November 2022 to current

Universal Softech Hub Pvt Ltd - Bengaluru

Project Details : FundsIQ(Mutual Funds Management)

Client : Credit Swiss (TCS Clients)

Role : Product support Engineer

Location : Bangalore India

Skills : Oracle SQL / PL Sql , Unix, Control-M

Credit Swiss Wealth Management is a specialized service that serves the needs of Ultra High Net-Worth, High Net-Worth and affluent individuals, families businesses, trusts and charities in Canada and around the world.

Roles and Responsibilities

- **Provide technical support and guidance to user and stakeholders regarding the FundsIQ platform.**
- **Troubleshoot complex FundsIQ system issues.**
- **Document troubleshooting steps and maintenance procedures for future reference and knowledge sharing.**
- **FundsIQ production and non production environment maintenance.**
- **Good understanding of FundsIQ infrastructure and setup.**
- **Experience working with FundsIQ batch and be able to resolve batch related issues.**

- **Building and enhancing documentation** required for production support.
- **Work with DevOps team to integrate FundsIQ with CI/CD process.**
- **Should be able to respond to production incidents quickly and resolve issues within the SLA.**
Incident and problem management process during My:
- **ETL jobs monitoring using Autosys tool.**
- Responsible for running and managing scheduled jobs and take required action on failures within SLA
- **Running SQL & hive queries using SQL workbench and Py-spark technology for validating input and output table data.**
- **Validate the output of all the frequencies on daily basis.**
- **Defined hive tables and performance tuning options.**
- **Ticket Analysis and data Fix.**
- Involved in client's call to gather requirements and solutions.
- **Ensure all the project details are documented.**
- **Reporting SLA /OLA and no of incidents and reasons for job failures details on daily basis.**
- **Find the root cause of the failures and take necessary action.**
- **Work with developers on the failures and resolve the failure on further runs.**
- **Coordinate with team leads to drive customer cases to closure.**
- **Providing quick backend support for work arounds.**
- **Created detailed reports outlining the status of each technical issue reported by customers.**

Product Support Engineer

February 2021 to October 2022

Universal Softech Hub Pvt Ltd - Bengaluru

Project: – Collaboration driven innovation project

Role: Database/ Technical Support Engineer

Client: Australia and New Zealand Banking Group Limited (ANZ) (Capgemini Clients)

Skills: SQL Python Unix Python Shell Scripting PL/SQL JIRA

Roles and Responsibilities:

- **L1 & L2 Technical Support & Troubleshooting:** Provided **comprehensive technical support** for **ANZ Bank core applications and database systems** ensuring **high availability and minimal downtime** for critical banking operations.
- **Incident, Problem & Change Management:** Managed **ITIL based workflows** in **ServiceNow** overseeing **incident resolution root cause analysis (RCA) and change management processes** ensuring compliance with **SLAs best practices**.
- **Database Performance Optimization:** Tuned **SQL and PL/SQL queries** to enhance **data retrieval speeds** reducing query execution times by **40%** and improving **overall application efficiency**.
- **ETL & Data Processing Support:** Assisted in **ETL job monitoring and debugging** ensuring **seamless data migration and transformation processes** across different financial systems.
- **SaaS Application & API Support:** Diagnosed and resolved **SaaS platform issues** including **API failures integration challenges and performance bottlenecks** improving **system reliability and uptime**.
- **Unix/Linux commands** (grep, awk, sed, cut, ps, kill, nohup, bg, fg) for **log analysis process monitoring and troubleshooting** ensuring smooth application performance.
- **Network & Infrastructure Monitoring:** Conducted **server performance analysis network troubleshooting and system health checks** preventing potential failures and improving uptime.
- **Automation & Scripting:** Developed **Python scripts** to **routine maintenance tasks** reducing manual effort by **30%** and ensuring efficient system monitoring.
- **Stakeholder Collaboration:** Worked closely with **cross functional teams developers and business analysts** to ensure **seamless communication between technical and non-technical teams** improving project execution.
- **Technical Documentation & Knowledge Sharing:** Created detailed **technical guides SOPs and knowledge base articles** to improve response times troubleshooting efficiency and **onboarding for new team members**.

- **Continuous Improvement & Process Enhancement:** Identified **recurring issues** implemented **preventative measures**, and suggested **process optimizations** leading to a **20% improvement in incident resolution efficiency**.

Education

Bachelor of Computer Applications : June 2019

Andhra University - Kakinada

Skills:

- | | |
|----------------------------|------------------------|
